## Amendment to Britain's Global Role consultation: March-June 2014

Dear CLP Secretary,

The time has come for Labour CND activists to talk about Trident and nuclear disarmament at their next constituency meeting.

The Labour Party has published its final year policy consultation documents for the election manifesto and the Britain's Global Role document restates a commitment to Trident replacement unless the party is 'convinced otherwise'.

The window of opportunity for constituency parties and affiliates to submit amendments by 13th June.

Amendments will be considered by National Policy Forum (NPF) members and discussed in July at the final meeting of the NPF before Annual Conference.

- CLPs may submit up to ten amendments by 13th June.
- Read the original Britain's Global Role document at: <http://tinyurl.com/yourbritain-labourcnd>
- Please copy details of amendments submitted to Britain's Global Role to [info@labourcnd.org.uk](mailto:info@labourcnd.org.uk)

---

LABOUR CND AMENDMENT TO:

### BRITAIN'S GLOBAL ROLE

P5

DELETE LINES 41-48 AND REPLACE WITH:

Labour is committed to achieving global nuclear disarmament and welcomes growing discussion of the humanitarian impact of nuclear weapons by fellow states.

We recognise the success of past international bans in delegitimising weapons of mass destruction such as landmines, cluster munitions, and chemical and biological weapons and support a similar process to ban nuclear weapons, as a complementary and necessary mechanism to our disarmament commitment under the Non-Proliferation Treaty.

Labour will decommission rather than replace Trident. Labour will re-direct Trident spending to where it best serves our Society. Labour will develop an industrial plan to make use of the skills of those workers in the sector.

---

Yours,

Walter Wolfgang
